

Integrated EMIS

iEMIS User Manual

1. About this manual

This manual explains how to use Integrated EMIS (iEMIS), the Education Management Information System of the Elementary & Secondary Education Department, Khyber Pakhtunkhwa. The portal covers office and school profiles, human resources, students, school self reporting, assets, Parent Teacher Councils, textbooks, monitoring, dengue control and the District Performance ScoreCard. Each section below follows the same order as the on-screen **hris tutorial**, which can be opened at any time from the blue bar at the top of the portal.

2. Signing in

- Open the portal address supplied by your District Education Office.
- Type the username issued to your school or office (school admins sign in with the EMIS code account created for their institution).
- Type your password and press **Sign In**.
- If the password is forgotten or locked, contact the EMIS focal person in your district office — the portal does not disclose credentials.
- Use the user menu at the top right for **Change Password** and **Sign Out**. Passwords must be at least 8 characters.

3. Main navigation

The dark tree on the left lists **12 module groups** and **58 features**. Click a group to expand it, then click a feature to open it. The hamburger button in the blue bar collapses or expands the tree. The table below summarises the groups.

Group	What it covers
Office/School MIS	School and office profiles, office/school reports, school data certificates, content for social media.
HR MIS	Employee profiles, teacher attendance, attendance and leave reports.
Students MIS	Student profiles, enrolment campaign, attendance, class updates, promotion, migration.
School Self Reporting (SSR)	SSR form entry plus sixteen SSR audit reports.
Assets MIS	Asset profile, asset details and consolidated asset report.
Survey - Environment Friendly Trees	Tree survey grid for the school premises.
PTC MIS	PTC headwise available amount and PTC schools demand list.
PTC Hiring (Talent Pool)	Applicants list for PTC positions.
Textbook Board	Free textbook demand list and book demand details.
Monitoring Dashboard	ASC versus iEMIS comparison charts.
Dengue Control Campaign	Weekly dengue inspection records.
District Performance ScoreCard (DPS)	District rankings and iEMIS updation reports.

4. Working with reports

- **Filters** appear as boxes above the report (school gender, district, tehsil, union council, leave type, status, dates). Pick values to narrow the rows shown.
- **Search** — type any word in the search box and press **Search**; the report keeps only matching rows. Press the magnifier button to choose which columns to search.
- **Saved Reports** — switch between saved report layouts such as *1. Primary Report*.
- **Rows** — choose 50, 100, 500 or All to control page size.
- **Actions** — opens the refresh and download options.
- **Download** — exports the current view (including applied filters) to a CSV file for Excel.
- Click a column heading once to sort ascending, twice for descending.

5. Data entry

Pages that accept data show a red button at the top right — for example **Create**, **Add Employee**, **Add Leave Record**, **Add Row** or **Mark Attendance**. Pressing it opens an entry form with the exact fields used by the department. Fields marked with * are required. After saving, a green confirmation appears and the new row is shown in the report immediately.

- The pencil icon in a row opens that record for editing.
- The bin icon deletes a record after confirmation.
- Editable grids (PTC headwise amount, tree survey, monitoring values) use the **Edit** button first, then **Save** to write all changed cells. **Add Row** appends a blank line, **Reset** discards changes.

6. Attendance

Teacher Attendance and **Student Attendance** open the daily register. Choose the date, shift and class, mark each person Present, Absent, Leave or Sick Leave, then press **Save**. Summary chips above the register refresh immediately. Registers can be edited again on the same day; reports under HR MIS and Students MIS print the official audit of both workflows.

7. School Self Reporting (SSR)

Fill the **School Self Report (SSR) Form** section by section — basic information, staff, buildings, facilities, commodities and enrollment — pressing save after each part. The sixteen SSR reports listed under the same group provide printable audits (staff detail, sanctioned versus filled posts, building data, basic facilities, classwise enrollment and more).

8. Install as an app

Press **Install App** in the blue bar to install Integrated EMIS as an application. On Chrome and Edge the browser shows an install prompt; on Android use *Add to Home screen*; on iPhone or iPad use Safari's Share menu and *Add to Home Screen*. The installed app opens in its own window with the department logo on the home screen.

9. Support

- Account issues — contact the EMIS focal person at your District Education Office.

- Data corrections — open the relevant record and use the edit action, or raise the correction with the district office.
- Training — the **hris tutorial** link in the blue bar contains a walkthrough for every module group.
